HEALTHY NOMAD

Medical travel with trusted clinics in Istanbul, Athens and Heraklion

Verified clinics, all-in quotes, flights, stay, transfers and follow-up at home

For clinic international desks and independent representatives

Planning alone · hotel room abroad

Medical travel abroad lacks a trust layer, not clinics or patients

Unverifiable. Travellers can't check licences, surgeon credentials or whether reviews are real.

Incomparable. Quotes arrive as PDFs in different currencies, with hidden extras like anaesthesia, hotel stay, transfers and revisions.

Scattered. Flights, stay, transfers and clinic contact spread across calls and chats, so handovers get lost.

Disconnected. Aftercare often stops at discharge, leaving patients alone at home after the trip.

One platform, from first search to the journey home

Healthy Nomad is the trust and care-coordination layer for medical travel, for treatment in Istanbul, Athens and Heraklion, not another lead marketplace.

01

Discover

Verified destination clinics, flights, stays and airport transfers.

02

Coordinate

Treatment abroad, recovery stay, transfers and interpreters in one journey.

03

Recover

Return home with follow-up support and a named handover.

Four principles behind every medical journey

Verified, not advertised

Licences, accreditation and surgeon credentials checked before a destination clinic is listed.

Price clarity

One all-in figure for treatment, stay and transfers, so the quoted price is the paid price.

Continuity of care

Discharge summaries, follow-up plans and handover once the patient is back home.

Human support

Technology handles travel logistics and language; people handle fear, pain and decisions abroad.

PART ONE

Key features

Verified destination clinics, all-in quotes, a shared workspace for flights, stay and transfers, and aftercare that follows the patient home.

Verified Clinic Card: proof before you travel

Above the fold

Licence, accreditation, surgeon profiles, languages and verification date.

Labelled facts

Self-declared, document-reviewed or registry-checked.

Automatic pause
Booking pauses automatically when a destination clinic's essential credentials expire.

Real reviews
Completed bookings only; clinic, surgeon, representative and partners rated separately.

Arrival · destination clinic

All-in quotes for treatment abroad patients can compare

ONE STRUCTURED QUOTE PER PROCEDURE

- **Treatment**
- **Anaesthesia**
- **Hotel nights** and **airport transfers**
- **Interpreting** and **follow-up**
- **Exclusions**, stated up front

Compare up to four offers side by side; uncertain items are estimates.

Versioned quotes require renewed acceptance for any material change.

Deposits are held and released at milestones, so funds follow delivered care.

Representative · meeting a patient on arrival

The representative workspace runs every medical trip in one place

- Work with many clinics without exposing one clinic's cases or terms to another.
- **Package Builder:** clinic treatment, flights, hotel, airport transfer, interpreter and post-op nurse in one price and itinerary.
- **Tasks, deadlines, expiring quotes and logistics alerts** on one dashboard.
- **Commission** disclosed and paid automatically on milestone completion.

Recovery stay and aftercare keep the journey home connected

Recovery stay abroad, a discharge summary in the patient's language, then scheduled tele-follow-ups from home.

01

Day 7

First check-in.

02

Day 30

Healing review.

03

Day 90

Outcome follow-up.

Complication protocol routes to the clinic or a partner doctor at home. A patient-controlled journey passport keeps plan, contacts, invoices and records, shared with time-limited access.

Language, documents and privacy handled for patients abroad

12 languages

Supported in-platform, with human interpreters at the clinic and on escalation.

Multilingual consent

Source, reviewed translation and interpreter kept together.

Secure vault

Encrypted documents, consent-based sharing, EU data residency and audit log.

PART TWO

Benefits for every key user

Destination clinics, independent representatives and the travelling patients they serve.

What each key user gains

Clinics

- Clearer, pre-qualified requests and fewer cancellations from surprise costs
- A verified profile lets a good small clinic compete on merit
- Less reliance on pay-per-lead portals and €5–15 ad clicks

Independent representatives

- Every clinic, appointment and handover in one workspace
- Fewer phone calls and missing documents per case
- Client relationships and records stay theirs

Patients

Understand their options abroad, know who is helping, and keep care connected from search through the trip to home.

Advantages for medical travel over lead portals and spreadsheets

Capability	Healthy Nomad	Lead portals	Generic CRM and chat
Credential verification	Checked and dated	Paid visibility	None
Pricing	All-in, versioned quotes	Headline prices	PDFs
Trip and multi-clinic coordination	Built in	Clinic by clinic	Manual
Aftercare	Named home handover	Ends at enquiry	Ad hoc
Commissions	Disclosed	Hidden	Untracked
